

ABSTRACT

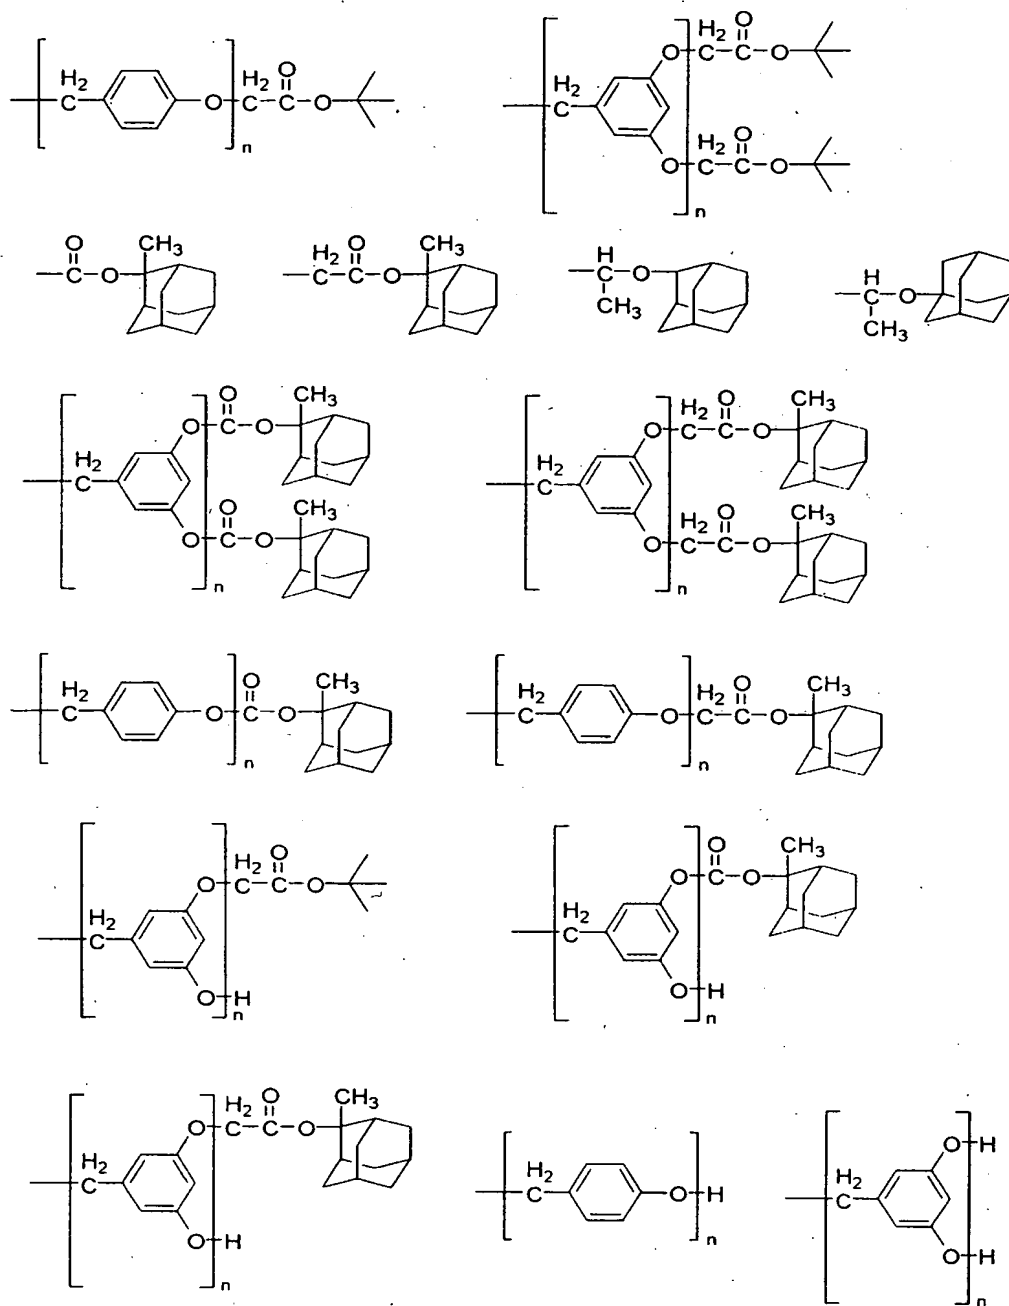

A calixresorcinarene compound shown by the following formula (1),

5

(1)

wherein R individually represents a hydrogen atom, a
1-tetrahydropyranyl group, a 1-tetrahydrofuranyl group, or one
10 or more organic groups selected from the group consisting of
the organic groups shown by the following formulas,

wherein n individually represents an integer of 1 to 50,
 provided that a compound in which R is selected only from a
 hydrogen atom, a 1-tetrahydropyranyl group, and a
 5 1-tetrahydrofuranyl group is excluded.
